Belanger Cat back exhaust \$1,195.00

This system is constructed of 3" aluminized steel for flexibility, long life and incorporates such features as: a balance (cross over tube), 4 Dynomax 3" race bullet mufflers and chrome tips. The Belanger system uses Vipers factory "J" hook hangers for easy installation. The sound is incredible but does not have that resonance between 1500 and 3000 RPM's like most other systems. Hardware is included as well as complete installation instructions. No modifications to your stock Viper are needed to install Belangers exhaust products.
